

K-Scale 12''

K-Scale 12'' QUICK GUIDE

The new interface for K-Scale 12'' is intended to facilitate interaction between the user and the scale, taking advantage of the visual power of the screens and intuitively showing the multiple possibilities of this weighing equipment.

The application will provide you the information and ability to immediately edit the database of products, sales, inventory, listings, the marketing tools integrated into your scales such as playlists, videos and images or tracking loyalty points for customers, among others.

Thanks to the ease of access to information on the scale, the application is characterized by attractive and simple menus and submenus, which allow you to program and configure this powerful tool intuitively.

This quick guide will be useful to know the different functions that the application makes available to you, as well as the different levels of information of the scale with which you can familiarize in a simple and fast way.

K-Scale 12"

Quick guide

Option to change user.

Exit

Closes the application.

Encase

Access to the document designer (tickets and labels)

Language

Select language to use.

The SATURNO range of scales is based on PC technology, incorporating touchscreen for vendor and VGA screen for client.

It offers diverse solutions for each form of work: counter model, hanging, self-service, etc.

All this, combined with an elegant design and a perfect control of peripherals, makes this scale an attractive and functional tool that makes the sale more pleasant, intuitive and visual for seller and buyer. It also provides the vendor with a powerful management and marketing control tool.
